FOREWORD

The Acquisitions List of Maps, Atlases and Guidebooks of Foreign Areas is published approximately twelve times a year by the Map Services Division, Office of Central Reference. In it are listed newly acquired foreign maps and geographic publications that have been added to the CIA map collection. It is arranged by geographic area and within the area, by one of 36 subject categories. The title, publisher, date, scale and security classification are given for each item.

All of the items listed in this reference aid may be borrowed for a period of one month. CIA maps with item numbers preceded by "C" are also available for retention. When requesting a map or publication, cite the item number and area/subject code. Atlases and guidebooks are identified by "PO" preceding the item number.

Map Services Division also can provide computer listings of maps, atlases and guidebooks from the CIA map collection. These listings can be sorted to cover one or more geographic area, city, subject, publisher, date, scale or classification.

To borrow items, receive retention copies of CIA maps, or to request a computer listing, call CIA Map Services Division or by mail: Central Intelligence Agency, Washington, D.C., 20505, Attention Map Services Division. CIA customers who have access to ODP's AIM system can request items by the use of the command CREATE OCRSERV. Field components of the Department of Defense should direct such requests through appropriate support channels—the Defense Mapping Agency Hydrographic/Topographic Center or the Aerospace Center.
